In re application:	Leighton et al
Serial Number:	10/779,691
Filing Date:	February 18, 2004
Art Unit:	2152
Examiner:	Dailey, Thomas J.
For:	<b>Network performance monitoring in a content delivery service (current)</b>  <b>Internet content delivery method using a network map generated by associating candidate Internet data centers with Internet Protocol (IP) address blocks from which requests for content resources are expected to be received (proposed)</b>

Mail Stop Issue Fee  
Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

**AMENDMENT UNDER RULE 1.312**

The Examiner is thanked for allowing this case. In reviewing the application prior to paying the Issue Fee, the undersigned recognized a number of informalities and errors that are sought to be corrected herein. The undersigned apologizes for not addressing these matters previously.

Please amend the application as follows:

**IN THE TITLE**

Please change the Title of this application to “Internet content delivery method using a network map generated by associating candidate Internet data centers with Internet Protocol (IP) address blocks from which requests for content resources are expected to be received.”
